

ANNEXE 8- NON-GEOLOGICAL SITES USED BY THE PROPOSED GEOPARK (INTERGRADED IN THE GEOPARK)

Natural sites

Cod.	Natural Site	Municipality	UTM X UTM Y Surface (ha)	Environmental values	Habitats of Comunitary Interest 92/43/CEE	Pressures	Threats	Protection figures
1	Aguilar Reservoir and Monte Royal	Aguilar de Campoo	391963474 0161 4067	The reservoir of Aguilar de Campo is a large body of water with bird communities of interest (migration and wintering) and unique peatlands in the emerged surfaces. In the north a series of rocky sleeve (Peña Cutral) is located with bird reproduction rupicola-rock interest. In the area surrounding the reservoir, extensive oak planted with conifers naturalized, among which Mount Royal, an excellent representation of roledales mesophyllous mature pines, with a remarkable diversity of forest wildlife, great value for such iconic and endangered species as they develop brown bear (<i>Ursus arctos</i>).	3150, 4020*, 4030, 4090, 5210, 6110*, 6170, 6210*, 6220*, 6410, 8210, 8220, 8230, 9230, 9240.	Hydrological management, excessive stocking, forestry, tracks, tourist and recreational use, introduction of exotic species.	New tracks and power lines, fracking, livestock intensification, land use changes.	Wetland Special Interest
2	Peña Pico area	Santibañez de Ecla, Alar del Rey, Ptrádanos de Ojeda, Aguilar de Campoo	390452 4730450 2612	The small mountain of Pico Peña is the westernmost formation of Las Loras and has significant altitude and a sharp shade. Unique high mountain Cantabrian meadow formations are presented. It houses extensive and mature oaks on the gentle southern slopes, which have a high diversity of flora and fauna. To the north of this mountain a number of karst valleys are developed with well-preserved gall oak woods and a multitude of great limestone walls where rupicola nourished bird communities are maintained	5210, 6110*, 6170, 6210*, 6220*, 9240, 9340.	Wind turbine parks, forestry, hunting, trail, mining, climbing	New parks of wind turbines, fracking, new tracks and power lines, new forest plantations.	Not in Natura 2000 Network
3	Las Tuerces site	Pomar de Valdivia, Aguilar de Campoo, Rebolledo de la Torre, Valle de Valdelucio	399628 4732813 2711	The unique karst complex condition of Las Tuerces keeping scarce habitats, with special interest in the nemoral and rupicola-rock vegetation of the limestone rock crevice cracks and alleys. The great walls of the southern flank of this space harbor large rupicola-rock populations of birds, with oak at the top of the moor and header mature and well maintained gall oak woods. The Pisuerga River at the western end, has carved the Canyon of Horadada and its unique system of caves, where interesting cave communities of birds and bats are located.	3160, 3260, 4030, 5210, 6110*, 6170, 6210*, 6220*, 6410, 6430, 7220*, 8210, 8310, 9240, 92A0, 9340,	Forestry, intense tourist-recreational use, mass sports events, vandalism, linear infrastructures (roads, railway, forest roads, power lines) climbing, mining.	New tracks, new facilities for public use, high speed line, fracking, extensions or new concessions for mining.	Included in Covalagua-Las Tuerces Natural Space, SAC Las Tuerces and SPA Humada-Peña Amaya
4	Monte Bernorio site	Pomar de Valdivia	402910 4739076 781	Monte Bernorio houses in the northern area a well-preserved forestry and forest system, with interesting old oaks on its steep slopes with several caves. The Lora platform, where once was located a famous Celtiberian castro- Fort, has extensive calcareous crio-peat grasslands with a remarkable floristic diversity.	4020*, 4030, 4090, 6170, 6220*, 6410, 8210, 8310, 9230.	Tracks, forestry, hunting, specific infrastructures (repeater, irrigation ponds)	Parks of wind turbines, fracking, abandonment or intensification of livestock farming, new tracks, land use change, archaeological research activities.	Not in Natura 2000 Network

5	Covalagua site	Pomar de Valdivia, Valle de Valdelucio	408335 4735613 1905	The Lora of Covalagua represents one of the best demonstrations of steppe habitats in this geographical context, with extensive summit platform on which sparse scrub and crio-peat meadows, dotted with many sinkholes with hazel and aspen develop. It constitutes a singular and little biotope with a remarkable diversity of flora and fauna. In its northern steep slopes limestone beech forests are maintained and mature yew Pyrenean oak woods are also very well preserved. In the valley of Covalagua a spring has developed a large tufa building, which is a very unique and scarce habitat. In addition to the Cave of the French, this Lora houses several highly developed caves not exploited for tourism.	3240, 4030, 5210, 6110*, 6170, 6210*, 6220*, 6410, 7220*, 8210, 8310, 9150, 9230, 9240.	Intense tourist-recreational use, public use infrastructure, forestry, water catchments and pipelines and roadways, livestock, mining.	Wind turbine parks, intensification of tourist use, new public facilities, fracking, farm livestock intensification.	Included in Covalagua-Las Tuerces Natural Space, SAC Las Tuerces
6	Lora of la Pata del Cid	Valle de Valdelucio, Basconillos del Tozo, Sargentas de la Lora, Berzosilla	419936 4732581 5370	The Pata del Cid Lora has slick extensive and well-preserved calcicolous mature oaks. In the southern part of the Lora there is a unique complex of rock sinuous channels representing calcic enclaves of thermophilic vegetation with numerous species of flora and fauna. It is home for rupícola ó stone/rock raptors reproduction and it is a habitat of great importance for the steppe flora and fauna.	3240, 5210, 6110*, 6170, 6210*, 6220*, 6410, 6430, 8210, 9240, 9340.	Wind turbine parks, tracks, power lines	New parks of wind turbines, fracking, new tracks and power lines, extensions or new concessions for mining, farm livestock intensification, land use changes.	Included in Hoces del Alto Ebro y Rudrón Natural Park, Hoces del Alto Ebro y Rudrón SAC and SPA Hoces del Alto Ebro y Rudrón
7	Lora of Sargentas	Sargentas de la Lora, Valle de Sedano	432754 4736737 3194	The Lora of Sargentas has an extensive moorland bounded by the great walls of the gorges of the Ebro. It is almost entirely dominated by mature oak and it is well preserved, with a remarkable diversity of flora and fauna. It also represents a biotope of great importance for the steppe flora and fauna.	5210, 6170, 6210*, 6220*, 8210, 9240, 9340.	Farm over-stocking, trails forestry.	Fracking, new wind turbine parks, new tracks and power lines, livestock intensification.	Included in Hoces del Alto Ebro y Rudrón Natural Park, Hoces del Alto Ebro y Rudrón SAC and SPA Hoces del Alto Ebro y Rudrón
8	Ebro River Gorges	Valle de Sedano	436070 4739188 458	It presents great walls with nurtured and diverse communities of rupícolas birds and bats interest, under which dense oak and gall oak woods develop. The bed of the Ebro river remains well preserved riparian forests, and it is a fluvial habitat of great interest.	7220*, 8130, 8210, 9150, 91E0, 9340.	Forestry, specific infrastructure (repeaters) and roadways, introduction of exotic species.	Fracking, new wind turbine parks, intensification of tourist use, new public facilities, new tracks and power lines, farm livestock intensification.	Included in Hoces del Alto Ebro y Rudrón Natural Park, Hoces del Alto Ebro y Rudrón SAC and SPA Hoces del Alto Ebro y Rudrón

9	Rudrón River Gorges	Sargentos de la Lora, Basconcillos del Tozo	425153 4727615 1698	Rudrón Gorges keeps mature oak and well preserved gall oak woods and remarkable forest river development. It is also presents large walls with rupicolous birds and bats reproduction.	5210, 6110*, 6170, 6210*, 6220*, 6430, 8130, 8210, 91E0*, 9240, 9340.	Linear infrastructure (tracks, water pipes), forestry, tourist-recreational use, introduction of exotic species.	Fracking, new wind turbine parks, intensification of tourist use, new tracks and power lines, farm livestock intensification.	Included in Hoces del Alto Ebro y Rudrón Natural Park, Hoces del Alto Ebro y Rudrón SAC and SPA Hoces del Alto Ebro y Rudrón
10	Peatbog of Las Loras	Basconcillos del Tozo, Villadiego, Valle de Valdelucio, Humada	418930 419801 414824 417624// 4726252 4719186 4728238 4722067 335	In several low sandy areas of Valdelucio Valley several enclaves with the presence of acidic peat bogs are located, with considerable interest from the floristic and vegetation point of view, as well as for invertebrates and amphibians. In some of these areas, peat extraction produced in past decades has favoured the establishment of pioneering own peatland habitats of great singularity in this geographical context.	4020*, 4030, 6220*, 6230*, 7140, 7150, 8220, 9230, 92A0.	Drainage, tracks, forestry, mining, farm over-stocking.	Cleaning drains and waterways, construction of new water reservoirs, new reclamation, extensions or new mining concessions, land use change, abandonment or farm livestock intensification.	Included in SAC Humada-Peña Amaya and Humada-Peña Amaya SPA; Include a proposition of a flora microreserve in Castilla y León
11	Peña Mesa and Peña Lora site	Rebolledo de la Torre, Valle de Valdelucio, Humada	408468 4727078 5746	This area covers a set of Loras and intermediate ribs with deep valleys. It has large areas of sparse scrub in platforms with interesting header forests among which the beech shadier exposures. In the common walls we found rock birds communities of interest and it is a habitat of great importance for the steppe flora and fauna.	4030, 5210, 6110*, 6170, 6210*, 6220*, 8210, 9150, 9230, 9240, 9340.	Forestry, tracks, farm over-stocking, hunting.	Fracking, new wind turbine parks, new tracks and power lines, livestock intensification, extensions or new concessions for mining.	Included in Humada-Peña Amaya SAC and Humada-Peña Amaya SPA
12	Peña Amaya and Albacastro site	Rebolledo de la Torre, Sotresgudo, Humada	402079 4723754 3744	Peña Amaya and Albacastro Loras are the higher elevations of the region, maintaining interesting disjunct high mountain plant communities. It presents many big walls that host rock birds communities, under which well-preserved header forests develop, among which the limestone beech forests of exposures shadier are present. It also implies a biotope of great importance for the steppe flora and fauna.	4030, 5210, 6110*, 6170, 6210*, 6220*, 8210, 9150, 9230, 9240, 9340.	Forestry, tracks, farm over-stocking, hunting.	Fracking, new wind turbine parks, new tracks and power lines, livestock intensification, extensions or new concessions for mining.	Included in Humada-Peña Amaya SAC and Humada-Peña Amaya SPA

13	Peña Ulaña site	Humada, Basconcillos del Tozo, Villadiego	418739 4721246 2421	Ulaña Pena is surrounded by walls that hold large rock populations of birds.	4030, 5210, 6110*, 6170, 6220*, 9230, 9240, 9340.	Forestry, tracks, hunting.	Fracking, new wind turbine parks, new tracks and power lines, livestock intensification, extensions or new concessions for mining.	Included in Humada-Peña Amaya SAC and Humada-Peña Amaya SPA
14	Rafts of Las Loras	Basconcillos del Tozo, Valle de Valdelucio	416340,5 418714,69 416475,59 416475,59 428208,63/ /4727787,5 4727409,5 4726512 4725735,5 4719228,5 62	In the low-lying valley Valdelucio several rafts of different sizes are located, with interest for birds and other wildlife groups linked to wetlands.	3150, 4020*, 4030, 9230, 92A0.	Hydrological management, introduction of exotic species, intensive fishing.	Cleaning and maintenance activities, changes in land use.	Included in Humada-Peña Amaya SAC and Humada-Peña Amaya SPA
15	Mesa de Úrbel site	Úrbel del Castillo, Villadiego, Basconcillos del Tozo	429035 4717164 2610	The Mesa de Úrbel is another smaller Lora of the territory, located in the southeast corner. It presents an extensive plane dominated by sparse scrub and cereal crops and it is a habitat of interest to the steppe flora and fauna. It also houses some walls with rock bird reproduction interest.	4030, 5210, 6170, 6210*, 6220*, 9240, 9340.	Tracks, forestry, hunting.	Fracking, new wind turbine parks, new tracks and power lines, livestock intensification, extensions or new concessions for mining..	Included in Humada-Peña Amaya SAC and Humada-Peña Amaya SPA
16	Riparian forest of Pisuerga river and Peña Cuervo site	Alar del Rey, Aguilar de Campoo	395481 4729333 71	Fluvial environment notably of forestry and conservation interest set by the Pisuerga river at its point of contact with the railway line south of Santa Maria de Mave. This section keeps interesting formations of natural poplar and willow-thin. The slope of the railway has cut the old meander of the Pisuerga generating a large standing at the foot of the rock formations of Peña Cuervo, densely covered with pine reforestation and regeneration of Pyrenean oak woods, very polifites tree formations and unique lagoon. This location presents considerable interest for wildlife connected to a very few well-preserved river and lagoon media in this geographical context.	3150, 3260, 4020*, 4030, 4090, 5210, 6410, 7140, 8220, 8230, 91E0*, 9230, 9340.	Railroad, forestry, tracks, water extraction, hunting.	New forestry, cleaning performances channels, new tracks and power lines, hunting and farm livestock intensification.	Not in Natura 2000 network

Cultural sites

Interest: his (historical), arc (archeological), mon (artistic, architectural, monumental)

In green are marked those sites nearby the limits of the proposed Geopark

BIC: Assets of Cultural Interest. **SCH:** Spanish Cultural Heritage
